

A Seminar on “Overview of Workshop on Principle & Practice of Clinical Research” by Dr. Suchit Kamble at NARI. [Date: 15 June 2018]

Recommendations (for common randomization methods)

- Use computer program or online tools
- Use permuted-block randomization with small random block size (<10)
- For multi-site clinical trials, use *site* as a stratification variable and in the statistical model
- Do not use too many stratification variables (≤4)
- Unless necessary, avoid response-adaptive randomization methods
